Masterstudiengang Architektur WS 20 /21 Sondergebiete der Baukonstruktion

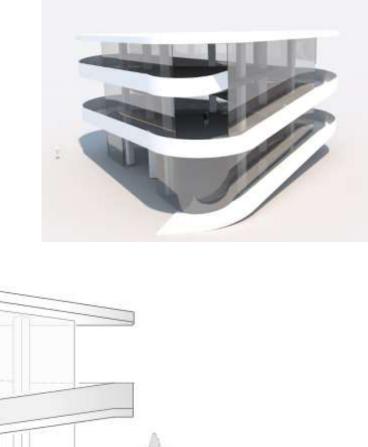

"Fahrradstation"

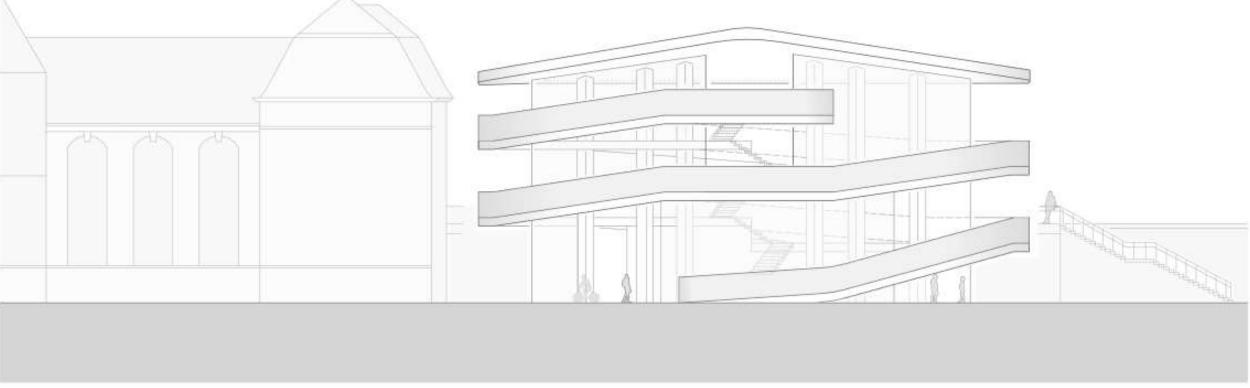

Hochschule Koblenz Prof. Jo Ruoff

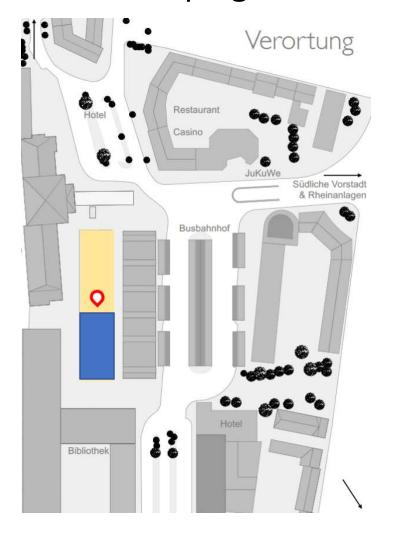

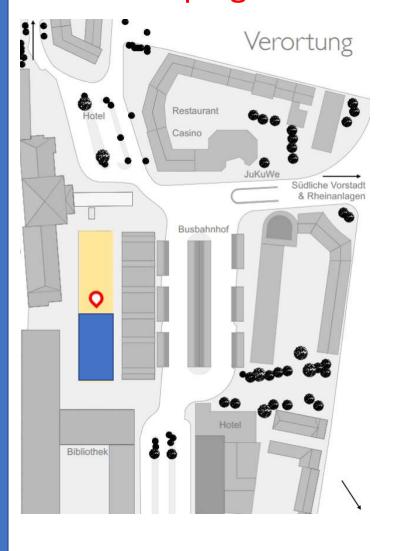

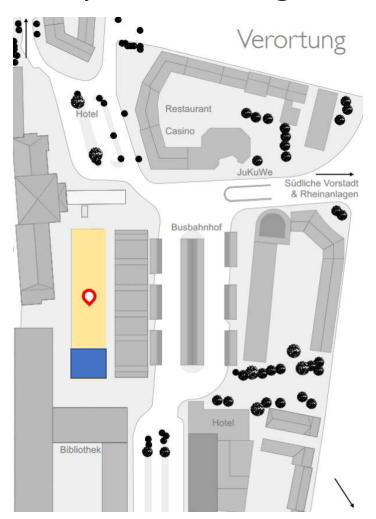

Hybride Lösung

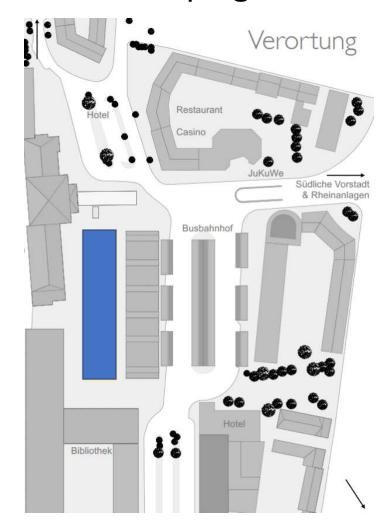

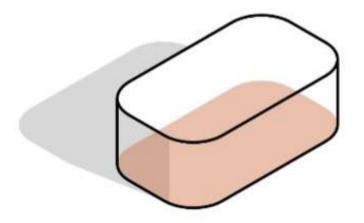

Hybride Lösung

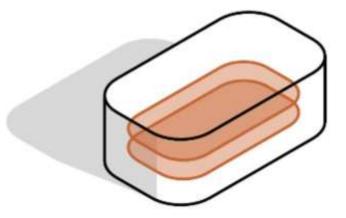

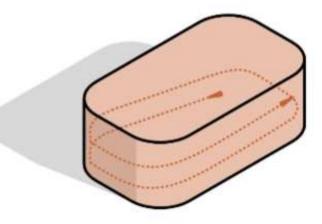

Grundfläche

Nutzung für Fahrradwerkstatt, Touristeninformation und Sanitäranlagen

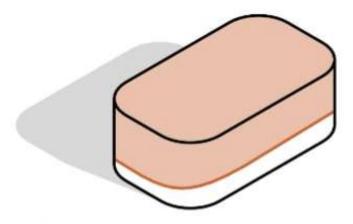

Parkdeck

Bereich für Stellplätze im 1. und 2. Obergeschoss

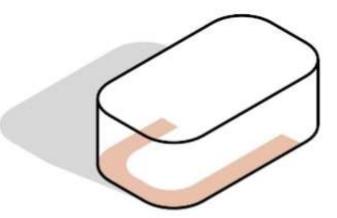

Erschließung

Zirkulation im Gebäude, Rampe mit max. 4% Steigung

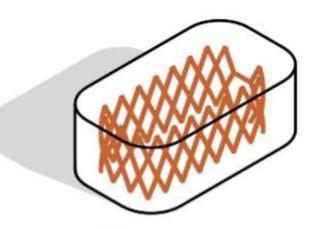

Fassade

Anpassen der äußeren Fassade an Rampe

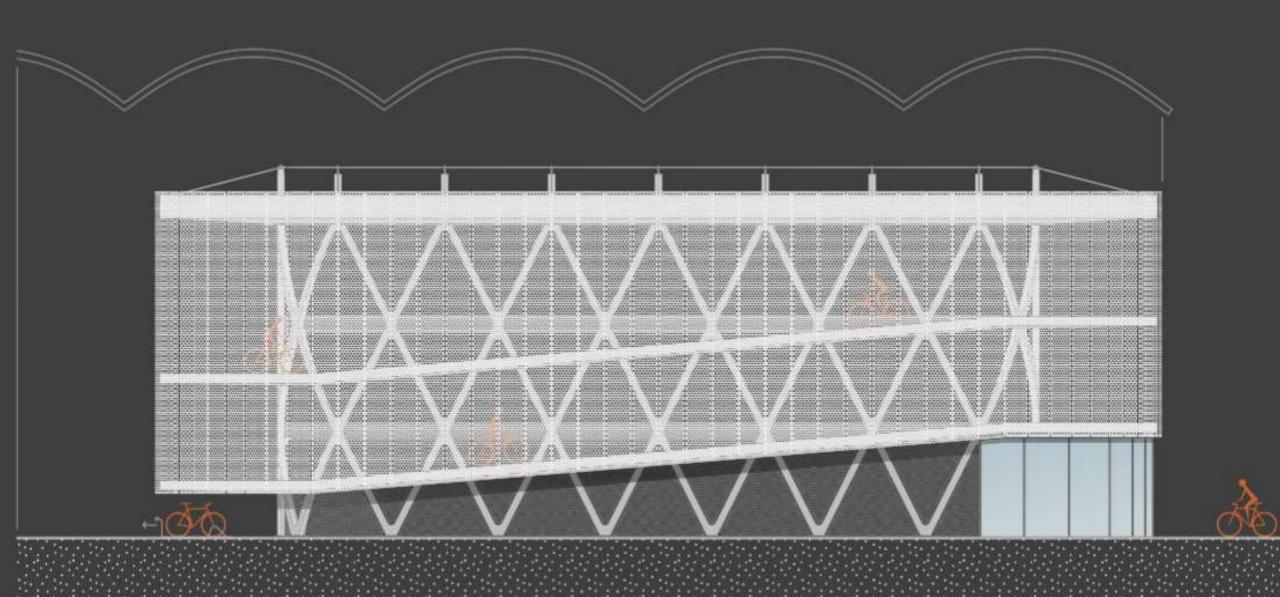

Kurzparkbereich

Überdachte Fahrradstellplätze im Außenbereich

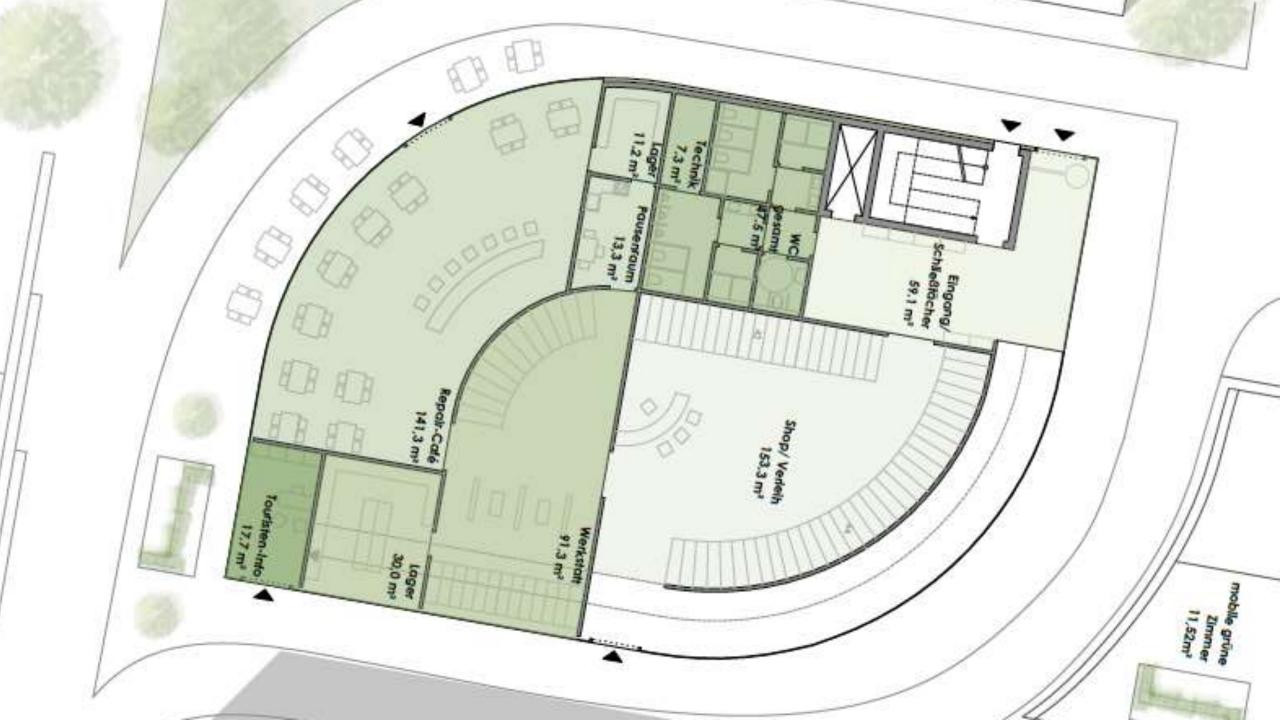

Tragwerk

Innenliegendes Trägersystem, Trägerkorb

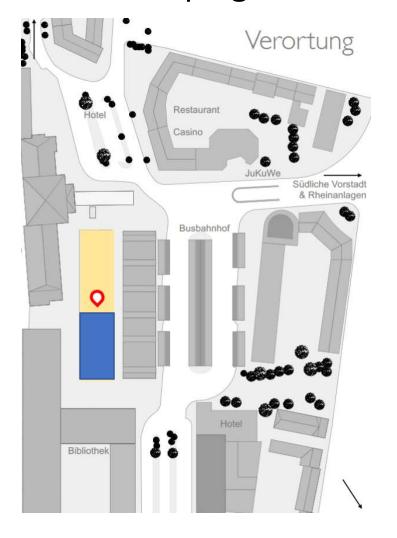

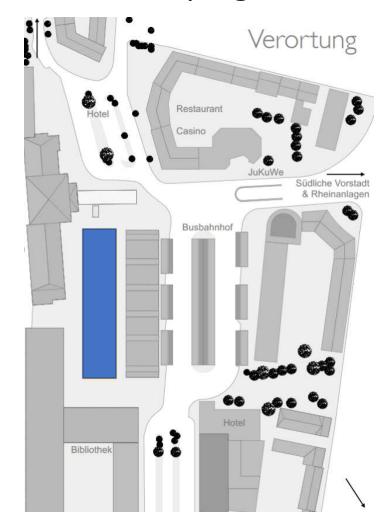

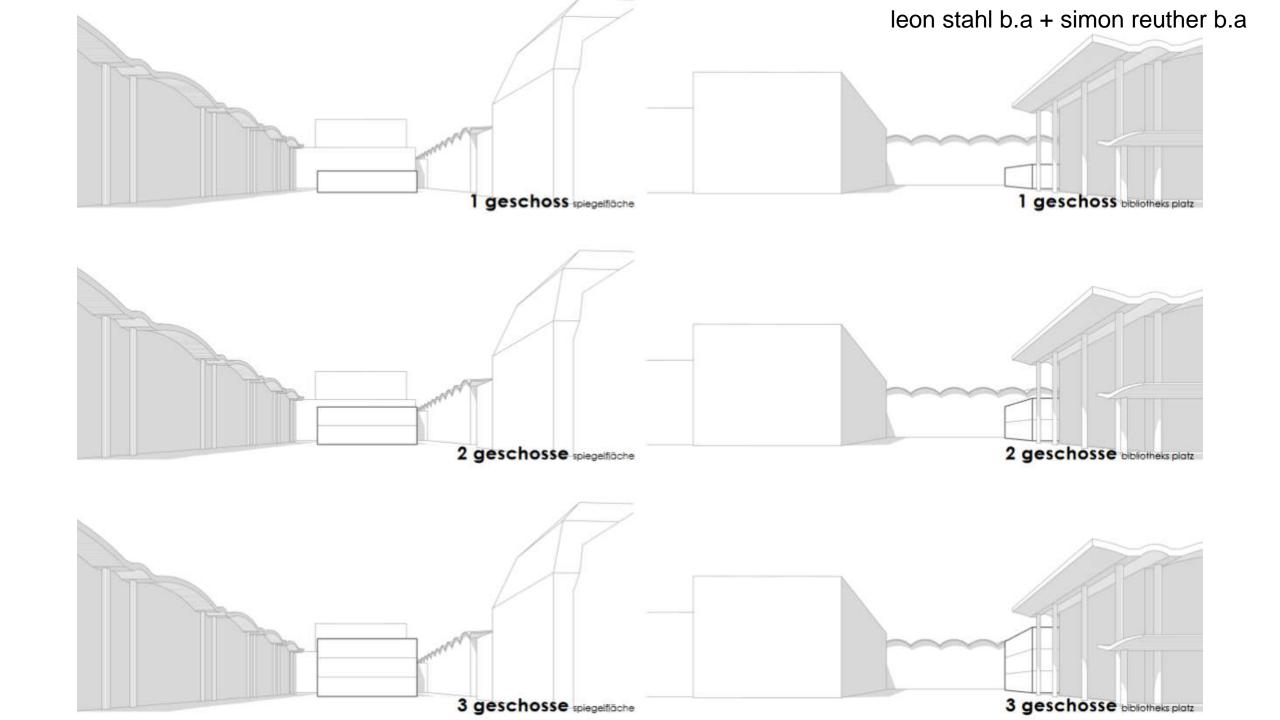

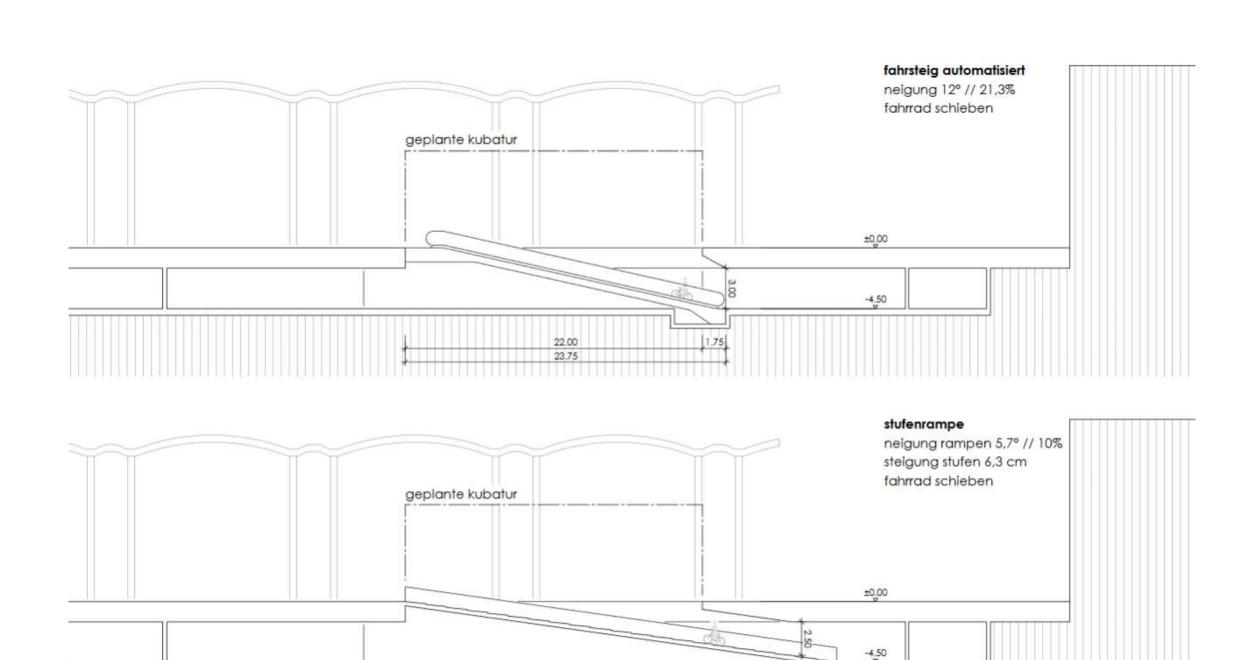

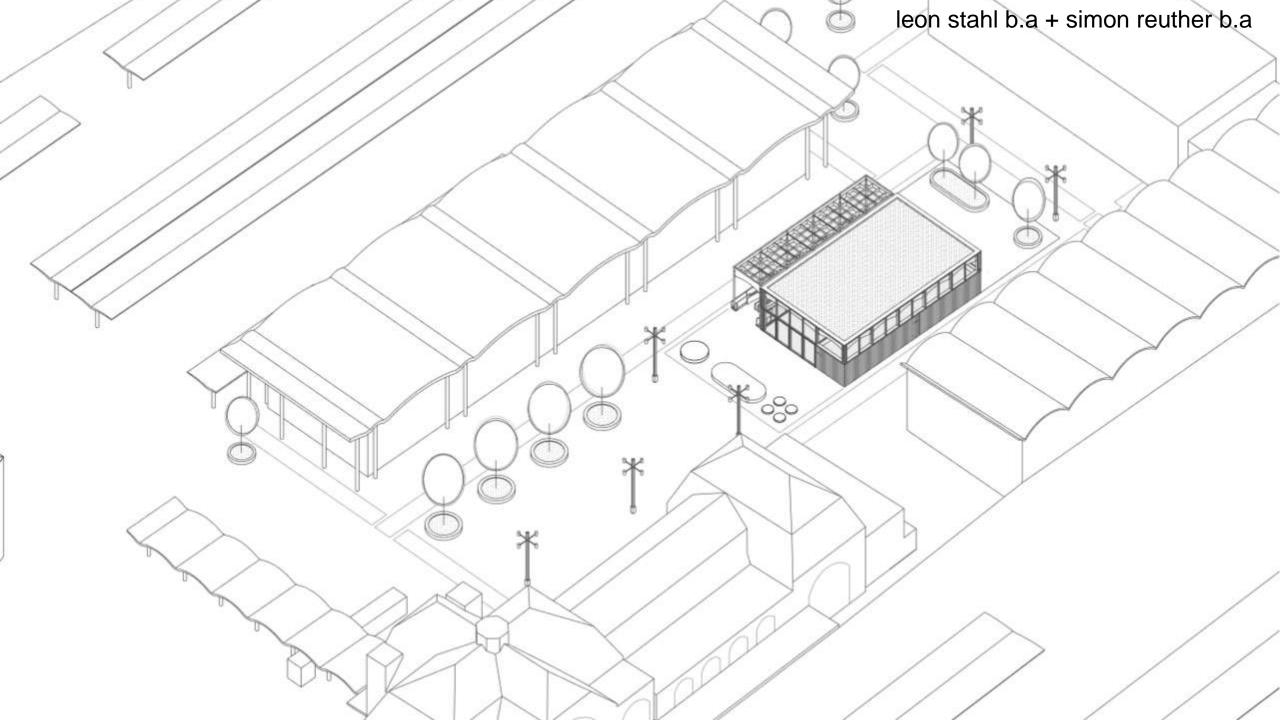

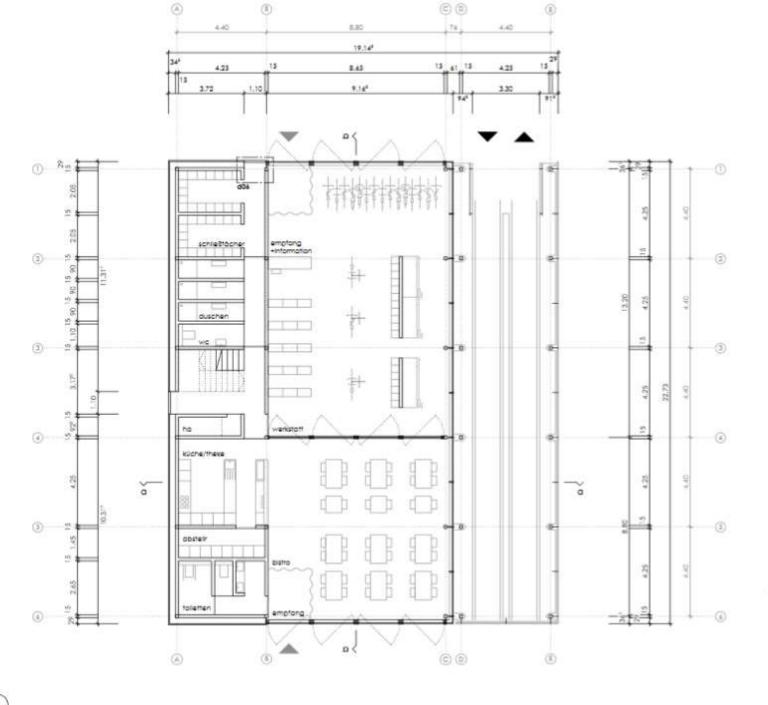

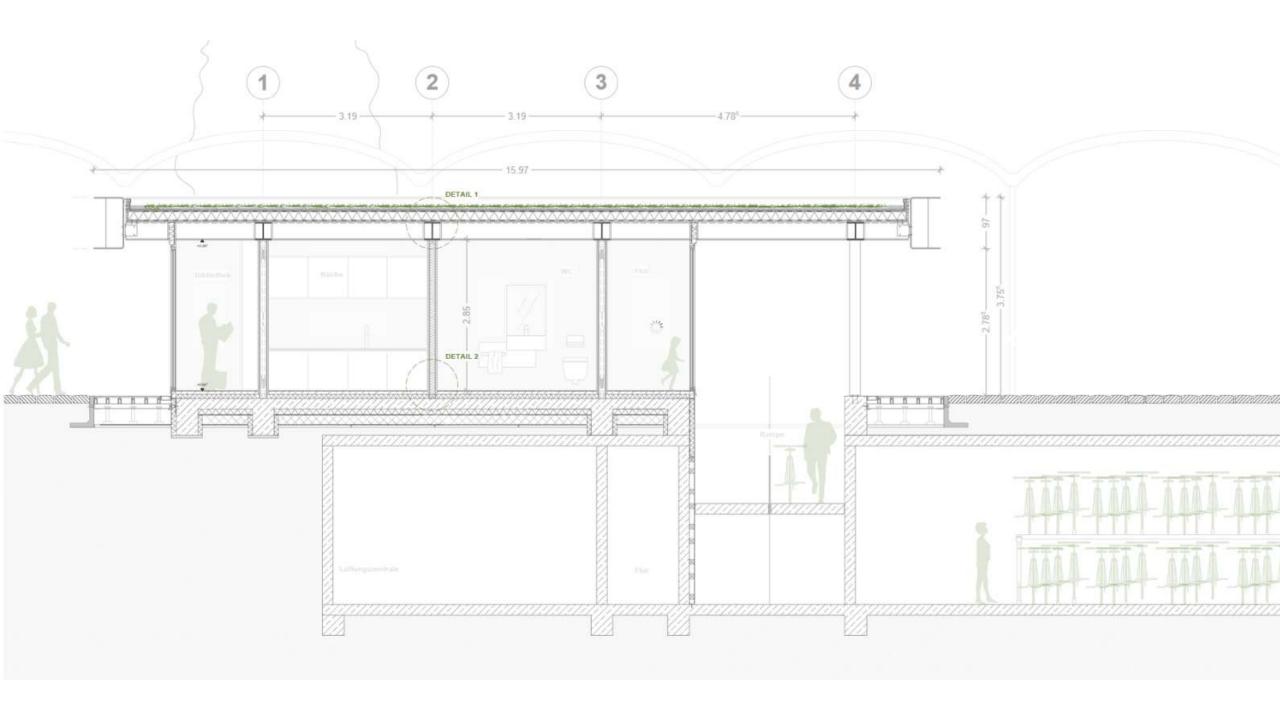

flexible grundrisse

- > das bistro und die werkstatt sollen kurzfristig variabel nutzbar sein
- > die werkstatt kann mit offener glaswand als "bühne" für veranstaltungen diehnen
- > sowohl in verbindung mit dem bistro als auch in richtung norden zum platz hin
- > auch langfristig ist die allgemeine grundrissstruktur auf nachnutzungen anpassbar

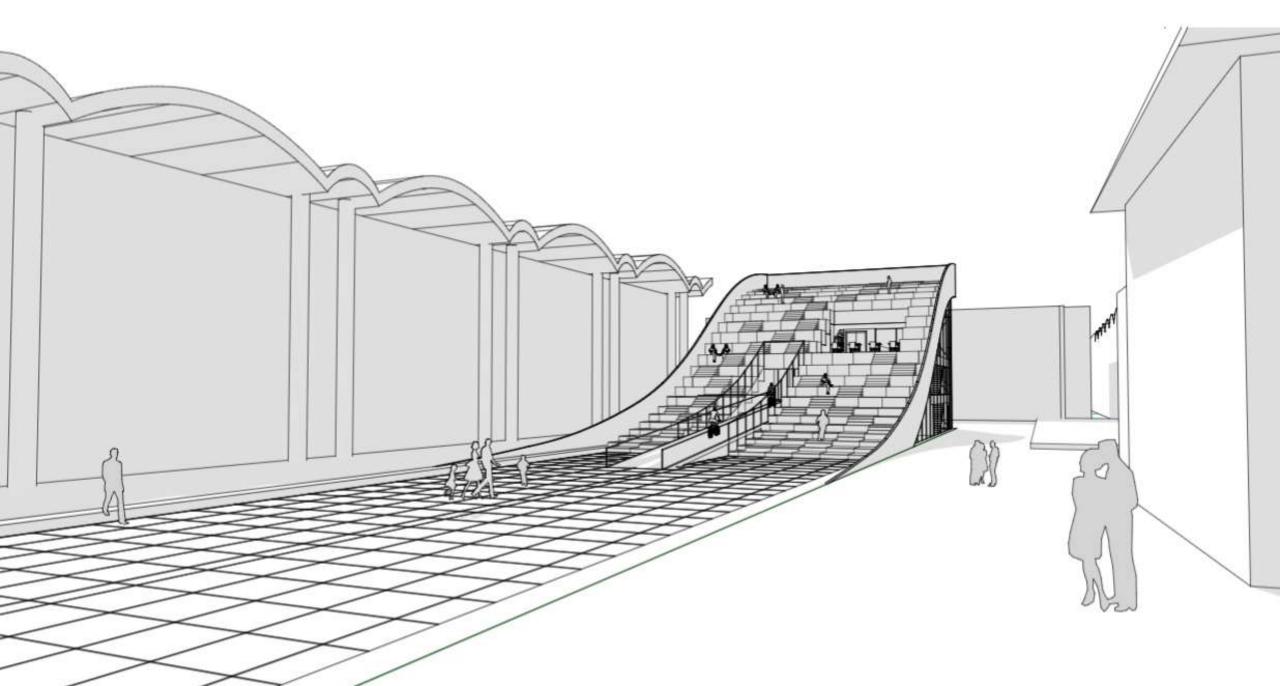

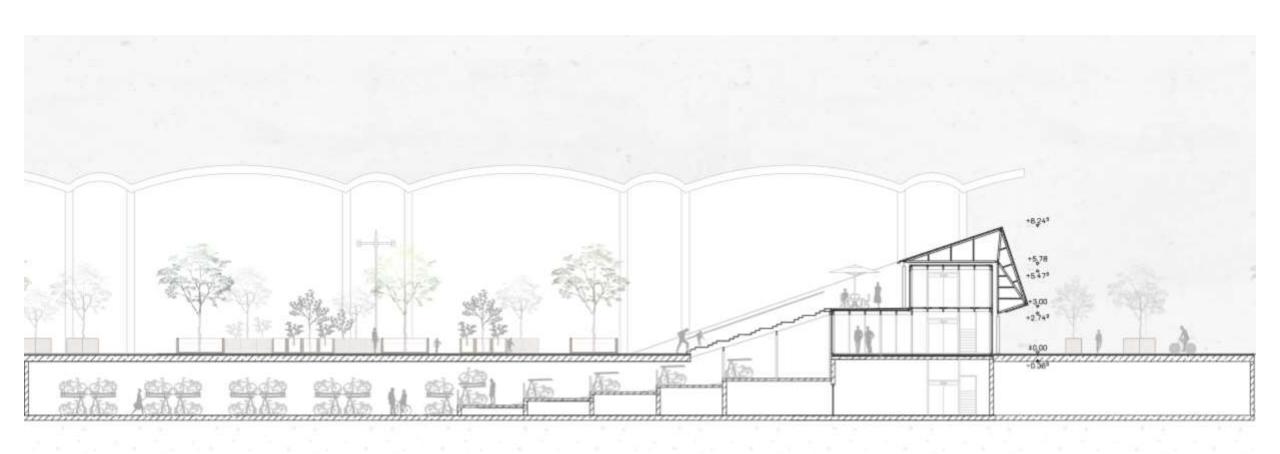

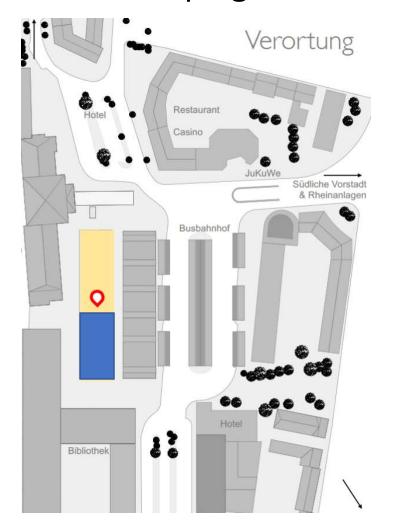

Marcel Gemünden & Ivan Tabakov

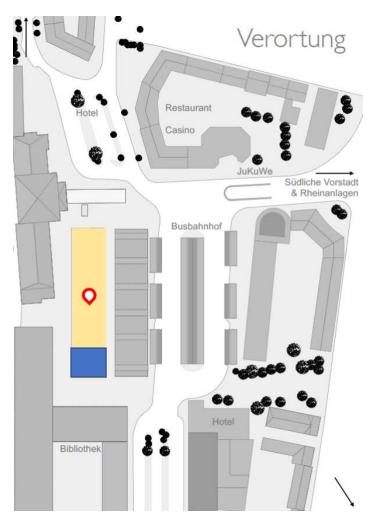

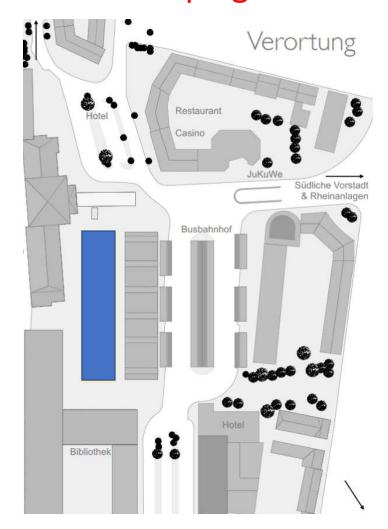

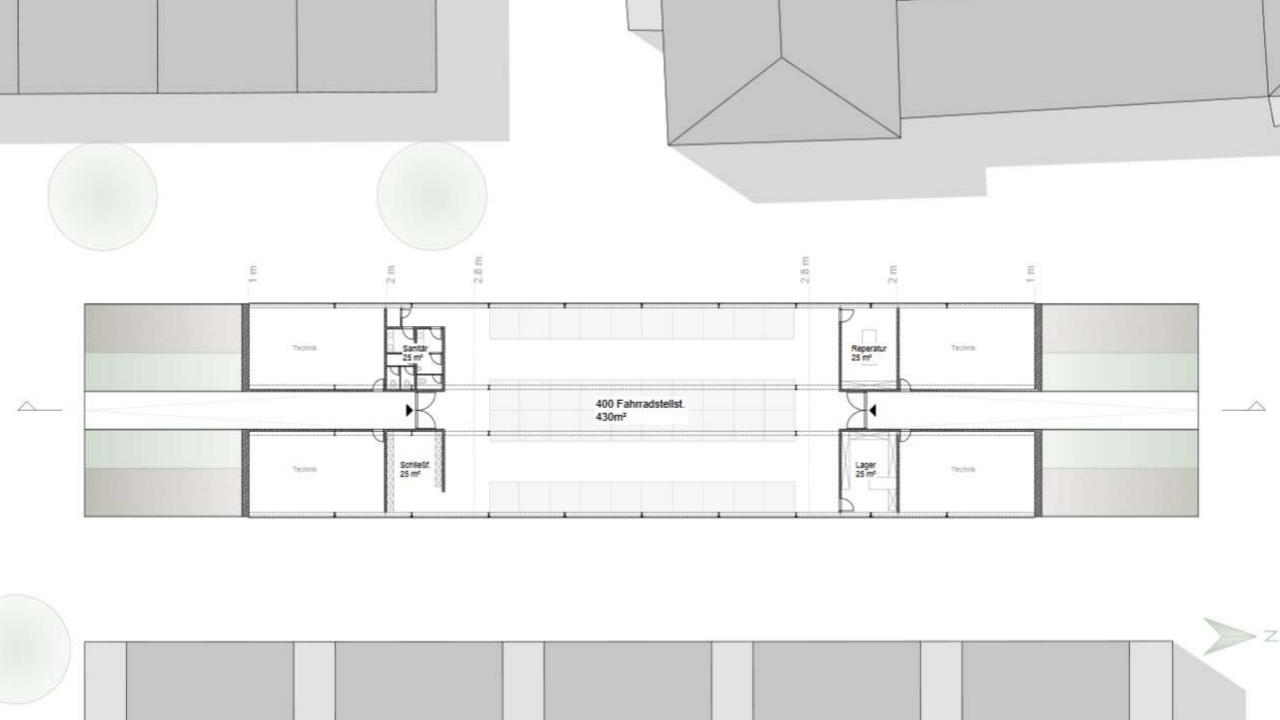

Hybride Lösung

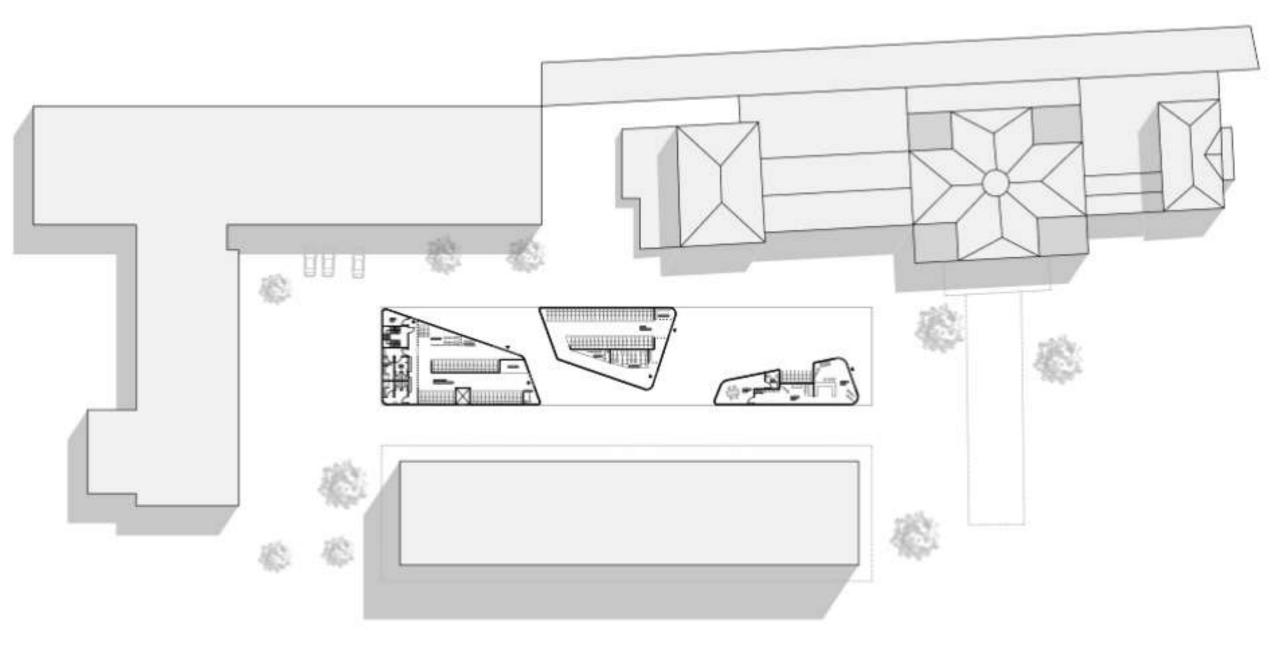

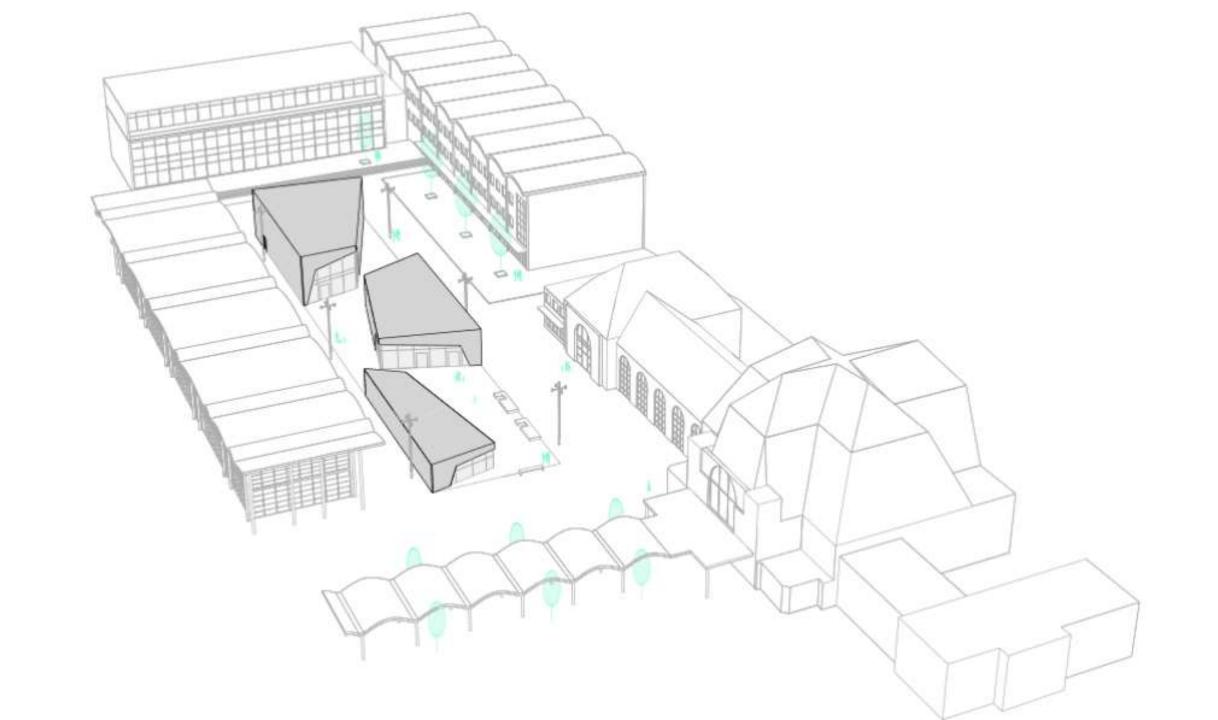

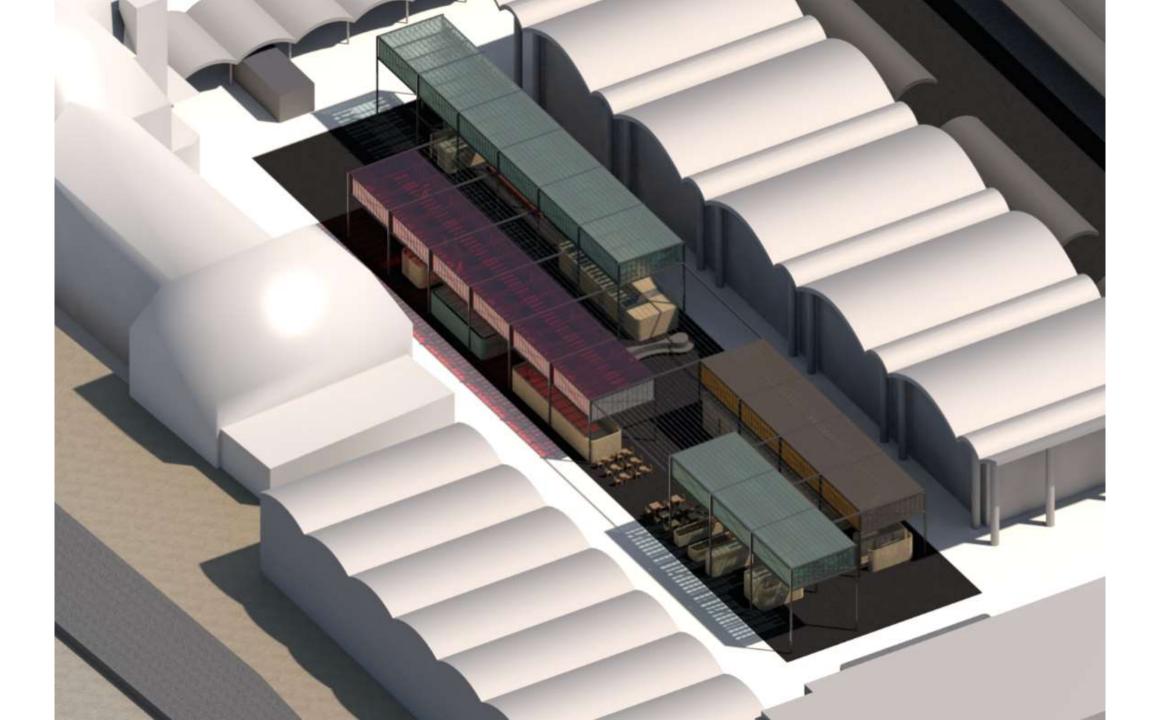

Steven Breisch / Leon Dören

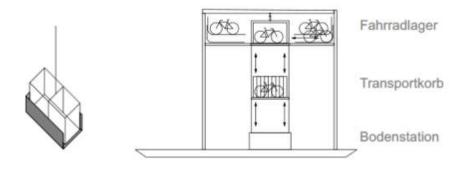

Automatisches Parksystem

Horizontale Verteilung

Masterstudiengang Architektur WS 20 /21 Sondergebiete der Baukonstruktion

"Fahrradstation"

Hochschule Koblenz Prof. Jo Ruoff

Ausblick

Sommer 2021: Weitere Studienarbeit Unterirdische Variante (Prof. Laubach)

Anbau / Erweiterung der Tiefgarage
